A guy who drives
A car wide open
Is not thinkin'
He's just hopin'

Burma Shave

**Robbie Gustafson's new
pawny agg.**

Plane electric flies great as
does Gregg Herreids electric
escapade. I was urged to get
a 2.4 ghz TX as others are
doing also. It looks like it
will rectify a lot of problems.
With four radios to
remember how to use, I
guess I shall keep the
manual with me at all times.

Princeton Flying Tigers Meeting Minutes May 14, 2010

The meeting was called to order by Greg Anselment at 8 p.m. at Godfather's Pizza in Zimmerman. 10 individuals were in attendance.

Lyman read the secretary's minutes from the previous meeting. No additions or corrections were noted. Larry presented the treasurers report.

Field Maintenance report

There was nothing to report. Bruce did an excellent job designing the new structure. Thank you very much.

Safety Officers Report

Don suggested you shut down your engine before making any adjustments. Always keep your aircraft pointed away from spectators. Some individuals have reported radio interference which causes momentary loss of aircraft control.

Old Business

Becky and Jim sponsored the project day and it primarily motivated Jim to work on his own airplane.

New Business

A call has been received to put on some sort of demonstration June 18 for approximately 200 Cub Scouts. Greg Anselment will call for further information. There are always liability concerns in these circumstances.

The parade is scheduled for June 10. Meet at the field at 4 p.m. to assist with the float. Please bring your planes.

On the fly-in date, Sunday June 13, bring your aircraft to the airport at 7 a.m. Attempts will be made to secure a better location for our display. The "Come Fly with Us" event will follow at 1 p.m. at our field. Jim will bring his generator. Larry has a small portable grill for brats and so forth. Greg will bring his pop-up camper.

August 6 is the Bailey Camp Fly. Space for campers is available.

Show and tell

We think a stealth plane was displayed.

Membership inquiry

Mr. X the unknown appeared at the field. We can only hope this apparition will appear again. It was stated that it is important for club members to greet visitors to the field.

Don Helps won the raffle and \$16 went to the club.

The meeting was adjourned at 8:40 p.m.

Respectfully submitted by Lyman Stein

Notes from the editor

During the May meeting, it was decided we should give Mr. Essig another \$100.00 to equal \$200.00 to cover his taxes on the field. On clean up day: Bruce Fedler, Robert Gustafson, Larry Carlson, Craig Lamatsch, Jim Cartwright, Don Bailey, Aaron Breikreutz, Greg Anselment, (and two watching, Gregg Herreid and Don Helps.) This shelter designed by Bruce and "gopher" Carson was built by the 8 members listed won't fall down anytime soon. The steel roof was donated by Don Helps (got to take credit for something!) and was cut in half by Larry Carlson. Installed by Larry and Don Bailey on May 14 training night.

Jim Cartwright and Larry Carlson brought generators and Bruce had his chop saw and lots of electric drills, etc. Bruce cut the wood to length and directed those with drills, bolts and screws how to assemble properly.

Aaron and wife, Marinda painted a new sign which is really great. Refer to the Minutes for upcoming events. Don
